

# FLAWLESS FLOORS ARE WITHIN YOUR REACH

Developed to meet the needs of the professional floor sanding contractor, Norton Premium Wood Filler is designed to save valuable time and money during the wood filling process. The zero waste formulation is freeze/thaw stable and unlike competitive wood fillers that use acrylic and latex binders, the proprietary binder in Norton Wood Filler allows the product to be reconstituted with water if it dries out.

Norton Premium Wood Filler also has higher solids content than other fillers which means you need to use less product to fill in gaps and you will get more square footage out of a container than other competitive products. Cover more space, using less product and limiting waste translates to overall cost savings.

**NORTON PREMIUM WOOD FILLER****FEATURES & BENEFITS**

- Zero waste; can be reconstituted with water if dried out and is freeze/ thaw stable
- Will not shrink and can handle seasonal movement with less chance of filler popping out
- Powders when sanded to limit loading, resulting in cleaner wheels and longer life from sanding belts and discs
- Higher solids content means less filler is needed in gaps, and containers yield more square footage than other competitive products
- Compatible with all oil and water based stains to create a consistent look throughout the floor
- Unique non-toxic, low VOC waterbased formulation dries fast and cleans up easy and poses no environmental or health risks
